

# Citrix Health Check

Optimize your Citrix environment  
with an expert review

## Be proactive, not reactive! Identify gaps and risks in your Citrix environment.

Over time your environment is open to misconfiguration, instability, process deviation and security exploitations. Even environments that seem to be working well have problems lurking that often only appear when critical applications are needed most.

## Why you need a Citrix Health Check

Our Citrix Health Check provides you with a point-in-time snapshot of the overall health of your Citrix environment. Use this new knowledge to focus on projects which will optimize your operations such as:

- Find configuration drift in your environment
- Enable functionality which you're not using
- Boost your infrastructure for user growth
- Re-align to new industry best practices

## Ask yourself:

Do we know the gaps in our environment? Do we have potential security threats addressed? Are we planning for the latest Windows Server upgrade? Are we capable of meeting SLAs?

## Review to include:

- Review of Microsoft and Citrix licensing
- Review of system logs, console & event logs
- Installed Citrix components, OS versions, service packs and hotfixes
- Remote access and security concerns
- Identify configurations that do not adhere to architecture best practice
- How new Citrix products/versions can solve business challenges
- Mobile device usage

## Citrix technologies we will assess

Our experts will provide a health check review on the following Citrix technologies.

- **Citrix Virtual Apps and Desktops**
- **Citrix Gateway and StoreFront**
- **Citrix Workspace App**
- **Citrix Endpoint Management**

<b>KEY DELIVERABLES</b>	<b>EXECUTIVE SUMMARY</b> Business drivers, key findings, short-term & long-term recommendations.
	<b>BUSINESS GOALS</b> Explains the goals of the overall business are for the next 3-5 years and what IT Projects are currently in the process.
	<b>USERS &amp; ENDPOINTS</b> User requirements of their workstations, the locations of the users and devices, types of users, Citrix client version and the challenges experienced by the user community.
	<b>DESKTOP &amp; APPLICATION DELIVERY</b> Identifies how users gain access to their Citrix desktops & apps, how they are maintained and updated.
	<b>INFRASTRUCTURE</b> Identify Citrix policies, system monitoring, server optimizations, user profile design and printing architecture, Citrix StoreFront configuration and SQL databases versions.

## Key benefits

This third-party review will not only be a health check to help you determine the health and status of your environment, but also provide an action plan to help you proactively maintain a supported platform.

- Third party review from award-winning Citrix Platinum Specialist
- Gap analysis of current technologies & patches
- Our certified engineers can quickly identify risks
- Ensure your systems run optimally
- Provides an overall review of architecture use cases, current and future state environments
- Enhancement opportunities and current preparedness for new releases
- Document recommended practices to improve your Citrix solution moving forward
